

THE IMPACTORS[©]

DEVELOPING LEADERS FOR
A BETTER WORLD

The Impactors

The Impactors is a three-month group coaching leadership program with Genevieve Hodge (MEd.), designed to enhance your leadership potential and make a positive impact in the community!

If you are a socially conscious young professional and an aspiring leader, this coaching program will enable you to explore and develop your leadership capabilities. Recent research indicates that coaching is invaluable for aspiring leaders, because of the difficulty in navigating the complex challenges that arise within the professional and external environment. To cultivate the inner capacity to deal with these challenges, the Impactor program will refer to the Inner Development Goals, a framework of internal skills and qualities individuals need in order to successfully work with complex societal issues, particularly those identified in the United Nation's Agenda 2030 and the 17 Sustainable Development Goals.

Who is this program for?

For those who are looking to step up their leadership, find their purpose and direction in their careers, and fulfill their need of making a positive contribution to the problems of the world.

Expectations

You are expected to be:

01. Committed to seeking to develop and deepen your learning as a leader (existing or aspiring)
02. Willing to do, or have done, some personal development work around self-awareness, emotional intelligence and compassion for self, others and the planet
03. Willing to engage and complete the community project and to reflect on the learnings
04. Committed to creating a positive and measurable impact in the community
05. Willing to engage in experiential inquiry and practice to explore the impact of yourself and how you perform in small group community projects
06. Willing to engage in pre-work and reading to extend your knowledge and skills

How Will You Benefit?

By the end of the program, the aim is for you to have:

- ✓ Deepened your understanding and appreciation of the complex elements of leadership (self, team and community)
- ✓ Developed your knowledge and skill in applying a range of models and theories related to the Inner Development Goals in a real-life project initiative
- ✓ Explored and practiced how you engage with others and in group settings, in order to better perform in professional settings
- ✓ Evaluated past and present challenges and reflect with different perspectives on how you can improve your performance in the future
- ✓ Increased your visibility through networking and gaining confidence in yourself as a leader

You will receive a **'Certificate of Completion'** at the conclusion of the program when we showcase your community project to professional organisations

Ideal Outcomes

(please note these will vary in each participant's experience)

01. Increased confidence in your leadership ability, ready for that next promotion or payrise!
02. Reduced Imposter Syndrome (increased courage, assertiveness and authenticity)
03. Increased job satisfaction
04. Clear plan for your future career
05. Sense of accomplishment and pride in contributing to an initiative greater than yourself (meaningful contribution to the community)

Organisational Benefits

Employees who feel they are contributing their skills to the best of their ability, and adding value to an organisation can counteract the 'Great Resignation'. Keeping professionals engaged and developing their skills through leadership coaching is invaluable for succession planning and employee retention.

Program Outline

The three-month program is divided into three phases:

Phase 1

We will meet in a small group setting online where you will be coached to be the most impactful leader you can be! Firstly, we focus on you and your self-leadership. We will do a stocktake of where you are now, where you want to be, and create a bridge with action steps on how to get there. You will have the opportunity to work through any unwanted beliefs or limiting thoughts/actions holding you back.

Secondly we look at how you are performing at work and create strategies on how to improve your performance.

Then you will design the plan of a small, yet impactful, community, professional or community intervention/ initiative of your choice where you would like to create positive impact!

Phase 2

Project implementation, where you will use the intervention as a safe space to practice your leadership. The aim is to create a measurable impact in your community, profession or personal life.

Phase 3

You are invited to honestly reflect on your performance, setting goals for improvement, and finally creating a showcase of results to share with the professional community and to celebrate our learnings together.

01.

02.

03.

Workshops

06

- There are a number of sessions which are compulsory to attend live- dates provided closer to program starting.
- Zoom meetings will be recorded and saved in a shared group folder in case you miss a session
- There will be an online group space for collaborative group sharing, to work together, ask questions, and support one another.

Format

- Delivered virtually, we will meet weekly for 2 hours.
- To make this learning opportunity accessible to those in all time zones, we have designed these workshops to be in the morning for European participants, and in the early evening for Asian and Australian participants
- Consideration has been given in the design to include small group work to reduce on-screen hours and encourage interactive participation with time and space to practice new ideas and principles in your community projects
